# 1. What, who

---

- Organizzazione non commerciale, fondata nel 1996 per diffondere in Italia la Evidence-based Medicine, attraverso formazione, editoria e ricerca.
- Due professionisti a tempo pieno, direttore scientifico e direttore organizzativo, ed un informatico part-time.
- Consiglio direttivo composto da 7 professionisti
- Comitato scientifico: rete multiprofessionale di docenti e collaboratori accreditati

# GIMBE® 10 anni dopo

---

1. What, who
2. **Attività Nazionali**
3. Attività Internazionali
4. The future
5. Thanks to...

## 2. Attività Nazionali

---

- Oltre ottanta articoli divulgativi sull'EBM, EBHC, CG
- Partecipazione a > 120 convegni, conferenze e seminari nazionali
- Presenza a > 50 corsi di formazione organizzati da altre organizzazioni
- Provider (n° 466) del Programma Nazionale per l'ECM: accreditati oltre 60 eventi (circa 2.000 crediti ECM)
- Rubrica "Manager Evidence & Health" (Sole 24 Ore Sanità).
- Affiliazione FISM

## 2. Attività Nazionali

---

- Collaborazione con numerose Istituzioni per la programmazione e conduzione sia di eventi formativi, sia di progetti di formazione-intervento finalizzati al miglioramento dell'efficacia-appropriatezza di prestazioni sanitarie.
  - Agenzie Sanitarie Regionali
  - Aziende Ospedaliere
  - Aziende USL
  - Industria farmaceutica e tecnologica
  - IRCCS
  - Società ed Associazioni professionali
  - Università

- Citato da numerose fonti nazionali ed internazionali
- Recensito in “Netting the Evidence” - la raccolta ufficiale dei siti internazionali sull'EBM - come “the best non-English Language EBM-site on the Web”;
- Certificato dal codice HON della Health on the Net Foundation
- Nel 2005 oltre 300.000 visitatori unici

## 3<sup>rd</sup> International Conference of Evidence-Based Health Care Teachers & Developers

The 3<sup>rd</sup> International Conference of Evidence-Based Health Care Teachers & Developers (EBHC-TD) was hosted in Taormina (Sicily), November 2–6, 2005, by the GIMBE® (Gruppo Italiano per la Medicina Basata sulle Evidenze). The island of Sicily was an appropriate location as during its rich history, multiple nationalities have left their indelible mark on its cultural landscape and architecture, setting the stage beautifully for this conference where the relevance of strategies for teaching and developing evidence-based practice (EBP) knows no national or disciplinary boundaries. The beautiful seaside resort of Hotel Caparena, overlooked by the historic Greek Theatre on the outcroppings of the volcanic Mount Etna, lived up to its promise as a suitable forum—an intense intellectual exchange in a relaxed and informal atmosphere—of 100 registrants representing 20 countries from 5 continents of the world.

The theme was “Building Bridges between Research and Teaching,” and the primary goals were to discover the current state of teaching and practice in EBP (key achievements and deficiencies) and to explore how the findings from current research on EBP can be incorporated into our teaching.

Plenaries, parallel sessions, posters, workshops, and theme groups were interspersed by time for networking. Throughout the 80 presentations given over 3 days by physicians, nurses, pharmacists, social workers, physiotherapists, veterinarians, policymakers, librarians, researchers, and educators working in settings ranging from primary to tertiary healthcare, academia, and government, several examples of research and real world applications of teaching and implementing EBP were given. Review of the abstracts and presentations at [www.ebhc.org](http://www.ebhc.org) provides testament to the variety of tools and strategies that were shared.

Some presentation highlights included

- experiences of EBHC teaching in 13 countries and 5 continents;
- development of tools such as the “GATE approach” (Graphical Appraisal Tool for Epidemiology—see [www.e-piq.co.nz](http://www.e-piq.co.nz)) to teaching medical literature appraisal and the “evidence cube” approach to organising evidence-based knowledge;

- descriptions and evaluations of courses in EBP for medical and allied health professional students;
- evaluations of evidence-based decision making programmes implemented in the hospital and outpatient setting; teaching collaborations between continents (Africa–USA, New Zealand–Canada); and
- movements toward collaborative research in EBP.

As a result of this international collaboration—began at the 1<sup>st</sup> (in 2001) and 2<sup>nd</sup> (in 2003) EBHC-TD Conferences in Sicily—the “Sicily Statement of Evidence-based Practice”<sup>1</sup> has been published, and a new journal has been developed, *Education for Evidence-Based Practice (EEBP)*, which will be launched by BMC journals in early 2006.

Feedback from the attendees was resoundingly positive, especially with gratitude for providing this unique and friendly forum to share tools, techniques, ideas, and programmes for EBP applied in different settings around the world. Attending delegates voted unanimously in favour of continuing to provide biennial EBHC-TD conferences, to be hosted by GIMBE® in Sicily—the symbolic representation of a safe middle ground to foster transprofessional and multi-national collaboration toward the common goal of advancing EBP in the real world, around the world.

We suggest you mark in your diaries now: the 4<sup>th</sup> EBHC-TD Conference in Sicily will be held on October 31<sup>st</sup>–November 4<sup>th</sup>, 2007.

### DOES EVIDENCE LEAD TO EFFECTIVENESS?

Vivian Lin  
Professor of Public Health  
La Trobe University

### PROCESS OF EVIDENCE-BASED PRACTICE

(Dawes et al, 2005 – Sicily Statement)

1. Translation of uncertainty to an answerable question
2. Systematic retrieval of best evidence available
3. Critical appraisal of evidence for validity, clinical relevance, and applicability
4. Application of results in practice
5. Evaluation of performance

## Welcome to *Education for Evidence-Based Practice*

### Editors-in-Chief

Andrew Booth, Reader in Evidence Based Information Practice, Sheffield University, United Kingdom

José Emparanza, Chief of the Clinical Epidemiology Unit, Hospital Donostia, Basque Country, Spain

*Education for Evidence-Based Practice* is an open access, peer-reviewed, online journal soon to be launched by [BioMed Central](#).

*Education for Evidence-Based Practice* will encompass all aspects of research in education and development in evidence-based practice.

*Education for Evidence-Based Practice* publishes peer-reviewed articles on research and innovation in all aspects of evidence-based practice including effectiveness, impact, feasibility, cost effectiveness, and teachers' and learners' perceptions. While primarily about education at all levels (undergraduate, postgraduate, and continuing education) it includes developments in evidence-based practice in general, such as implementation strategies.

*Education for Evidence-Based Practice* has an open peer review policy. Manuscripts that are deemed suitable for peer review will be assigned to at least two expert reviewers. The authors may nominate one reviewer and the Editors will choose at least one reviewer. Reviewers will judge the manuscript's originality, importance, validity, and relevance. The final decision to accept or reject a manuscript will be made by one of the Editors-in-Chief. The Editors-in-Chief may seek the editorial board's opinion when reviewers disagree or authors appeal.

*Education for Evidence-Based Practice* is now accepting submissions; please use our [online submission system](#) or contact the Publisher, the Executive Editor, at [eebp@ebhp.org](mailto:eebp@ebhp.org) for

## Introduction

## Il metaRegistro delle Sperimentazioni Cliniche Controllate ed il Numero Standard Internazionale dei Trial Controllati e Randomizzati

### Introduzione

"La registrazione di tutte le sperimentazioni cliniche non può più essere messa in discussione" (*BMJ* e *The Lancet*, ottobre 1999).

### A cosa può servire il metaRegistro?

- ◆ Assistere nella pianificazione di nuovi trial
- ◆ Evitare l'inutile duplicazione della ricerca
- ◆ Favorire la collaborazione tra ricercatori
- ◆ Ottimizzare la distribuzione dei fondi per la ricerca
- ◆ Facilitare ai pazienti l'accesso all'informazione e favorire il loro reclutamento per la partecipazione alle sperimentazioni cliniche
- ◆ Migliorare le opportunità per la ricerca metodologica
- ◆ Ridurre le discrepanze tra i protocolli originali dei trial ed i risultati pubblicati successivamente
- ◆ Ridimensionare il bias di pubblicazione

### A chi può essere utile il metaRegistro?

Il sito Current Controlled Trials (<http://controlled-trials.com>) viene realizzato nell'ottobre del 1998 in risposta alla crescente domanda di maggiore trasparenza sulle sperimentazioni cliniche. Il metaRegistro of Controlled Trials (mRCT) aiuta a promuovere la disponibilità e lo scambio d'informazioni sui trial condotti in tutte le aree assistenziali affinché:

- ◆ Pazienti e medici possano disporre di un'informazione dettagliata ed accurata sui trattamenti, così da informare meglio le proprie decisioni

## CCT News

## 4.3. Risorse

---

- Faculty **GIMBE**<sup>®</sup>: un network multiprofessionale di docenti e collaboratori accreditati da un processo a tre step: tutor → docente junior → docente senior
- Accesso, grazie ad accordi con centri di documentazione internazionali, ad oltre 70 banche dati e circa 5.000 riviste biomediche.
- EBHC International Library

# EBHC International Library

---

- Biblioteca metodologica, costituita da oltre 350 volumi, circa 30.000 articoli e monografie, organizzati in 5 categorie principali:
  - Basic Science (for EBP-EBHC-CG)
  - Evidence-based Practice
  - Evidence-based Health Care & Clinical Governance
  - Methodology of Clinical Research
  - Medical Education
- Lo sviluppo progressivo del “**GIMBE**® Thesaurus”, consentirà una classificazione analitica del patrimonio bibliografico

# EBHC International Library

---

- La versione cartacea della biblioteca, ospitata presso il Centro Studi **GIMBE**<sup>®</sup>, sarà disponibile per gli operatori sanitari da ottobre 2006.
- La versione elettronica, parzialmente disponibile sul nuovo sito **GIMBE**<sup>®</sup>, sarà rilasciata in versione beta entro la fine del 2006 all'indirizzo [www.ebhc.org](http://www.ebhc.org)
